

A. From REVIEWER alignments to reported allele structures

B. Reconstructing an interrupted allele

Schematic example; catalogue repeat unit: CAG

R6 lacks the left flank and is excluded.

(CAG)₂(CAA)₁(CAG)₂

Consensus-eligible reads

5

Reads matching the reported structure

4

C. Validation using SVG evidence

Broad assessment

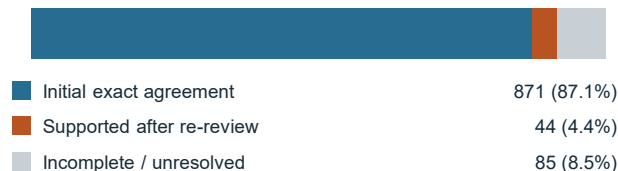

20 samples × 80 loci; 3 reviewers

1,600/1,600 outputs supported

80 loci represent 77 gene annotations

ZFH3 comparison

1,000 cases: 800 controls + 200 patients

Complete calls: 915/1,000 (91.5%)

Adjudicated agreement: 915/915 (100%)

Concordance was assessed against expert interpretation of the same SVG evidence.
